Portfolio · GitHub

PROFESSIONAL PROFILE

Software Engineer and Full-Stack Web Developer with a practical, project-led background in building responsive websites and web applications. Combines front-end development, back-end implementation and user-focused design to turn ideas into usable digital products. Portfolio work includes an education website, a full-stack e-commerce solution and a data analytics dashboard. Interested in clean code, maintainable solutions, performance and continuous learning.

CORE TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript, React, responsive interface development
Backend & Data	PHP, Python, Java, MySQL, SQL, backend application logic
Mobile & Visualisation	React Native, D3.js, interactive data visualisation
Tools & Practices	Git, GitHub, Agile/Scrum, project coordination, UI/UX awareness
Additional Languages	C, C++

SELECTED PROJECTS

Linah Academy — Education Website

Designed and built a responsive website for an early-childhood education centre, presenting program information and admissions details in a clear, accessible layout.

Technology: HTML, CSS, JavaScript

Live project | Source code

Full-Stack E-Commerce Platform

Developed a commerce solution featuring product routing, cart functionality, authentication and checkout workflows, with a focus on a straightforward customer experience.

Technology: React, PHP, MySQL

Data Analytics Dashboard

Built an interactive dashboard concept for presenting data through charts and visual summaries, including a dark-mode interface and backend data processing.

Technology: Python, D3.js, SQL

Portfolio: caintcreation.dev · **Code samples:** github.com/caintcreation

ADDITIONAL PROJECT & REPOSITORY WORK

Chuka Student Digital Assistance / KUCCP App

A student-focused web project repository containing PHP processing and administration files, front-end assets, and project documentation for a digital student assistance service.

Technology: PHP, JavaScript, HTML, CSS

Source code

EduPapers — Student Notes & Past Papers Portal

A PHP-based portal project with authentication, dashboard and administration components, database setup and content approval workflows.

Technology: PHP, MySQL, HTML, CSS, JavaScript

Source code

Nexus Events

A front-end event website repository with page structure, styling and interactive JavaScript assets.

Technology: HTML, CSS, JavaScript

Source code

DEVELOPMENT CAPABILITIES

- **Responsive web development:** Creating layouts and interfaces designed to work across desktop and mobile screens.
- **Full-stack implementation:** Connecting front-end experiences with server-side logic and relational databases.
- **Application problem-solving:** Breaking requirements into practical features and implementing functional user workflows.
- **Version control:** Maintaining and sharing project work through Git and GitHub repositories.
- **Delivery mindset:** Taking project tasks from initial idea through implementation, refinement and presentation.

EDUCATION

Applied Computer Science

Academic background in Applied Computer Science, as stated in the professional portfolio. Institution, qualification level and attendance dates were not published in the source material.

PROFESSIONAL STRENGTHS

- Analytical thinking and practical problem-solving
- Attention to usability, visual consistency and detail
- Self-directed learning and adaptability to new technologies
- Creative thinking and interest in UI/UX and digital product design
- Collaboration mindset and interest in Agile/Scrum ways of working
